

DIFFERENT STRATEGIES THE USA USES TO WORK WITH OTHER COUNTRIES

Diplomatic - A concerning the profession or activity or skill of managing international relations. The quality of Diplomatic is demonstrate an analytical temperament.

Military- The armed forces of a country. A military is a soldier.

The qualities of love, respect, multi tasker, selfless service and honor.

Economic- A relating to trade, industry and money.

A economic quality is control is devoted to all fields related to reliably finance, manufacturing, production and inventory.

For my opinion the best strategy is the economic because its important to study the money and what we use the economic for.

Another reason to use the economic is to make a deal of the united states to countries they maybe will agree or disagree. How much economic can we use for yourself or for someone else that is important to you in your life.
